Corning Cabelcon

Characteristic Impedance
75 Ohm

Performance
Operational to 3 GHz

Transfer impedance
(5-30 MHz)
<5 mOhm/mtr

Shielding Efficiency
F-56 5.1 class A+
IEC-56 5.1 class A

Tensile Strength
F-56 5.1 200N
IEC-56 5.1 147N

Plating
NiTiN-6™

For DIY and Wholesale

Corning Cabelcon now offers the popular and easy-to-install Self-Install™ connectors in a blister pack, for the Do-it-yourself and wholesale market. True Cabelcon quality products, packed in bundles that fit the needs of the end customer perfectly.

The blister packed connectors are available with both IEC and F connectors, both accompanied by our mini cable stripper tool, for easy and perfect cable preparation.

Design

The packages are generically designed with focus on quality and simplicity and with white space for dealer logo sticker in the top left corner. The headline and instructions are printed in 4 languages (English, German, French and Spanish). The picture installation guides printed on the back, are simple and easily understood, even for a non-technical person.

The F-package consists of 6 pcs. of F-56 5.1 Self-Install™ connectors and a cable stripper. The IEC-package consists of an IEC male 5.1 and an IEC female 5.1 connector, packed with the cable stripper.

The option of customized content and graphic design exists. For further information on this option, please contact our Customer Service Department.
